

Contract Assignment:

**Ground Water Field Technician**

Need 2 people with field sampling capabilities to perform ground water sampling and monitoring. Must be OSHA certified. Most of the work will be done in Reading, PA but some overnight travel is required to other sites in South Eastern Pennsylvania. For immediate consideration please call Kelly at 866-435-0353.

We will need 1 or 2 field technicians, with 2+ years of field experience and OSHA 40 Hour certified (for hazardous waste site operations). We would like to be able to call them on an as needed basis (Some weeks will be full, a few partial and some nothing). It appears that the demand will carry on into December and perhaps well after that.
